

Easter Jeep Safari Night Run

TRIP DESCRIPTION

Join Jeep Jamboree and Red Rock 4-Wheelers for a night run at Raven’s Rim during Easter Jeep Safari. Set on private property just north of town, the route climbs steeply to sweeping views of Moab below. Our expert guides will lead the group and spot drivers through technical obstacles that take on a different feel after dark. A minimum tire size of 35 inches is required, and we recommend aftermarket off-road lighting for better visibility on the trail.

These runs are possible thanks to Red Rock 4-Wheelers and their commitment to making Easter Jeep Safari an extraordinary experience for Jeep owners. Their work extends beyond Safari week, helping keep Moab’s public trails open for all users to enjoy.

If you’re already in Moab or planning your Easter Jeep Safari week, set aside an evening to see the desert after dark. Access to Raven’s Rim for these runs is reserved for registered participants. We’ll keep each group small so drivers have time to work through the obstacles with our guides and take in the view at the top.
