

JEEP EXPERIENCE OFFROAD TOURS 2025

ICELAND EXPEDITION

Your vehicle for this adventure: The Jeep Wrangler 4xe Rubicon: Expedition-ready. Lifted by 4.5 inches. 40" wheels. Integrated tyre inflation system: The air pressure can be adjusted to the changing conditions during the journey.

DIVERSITY OF ICELAND.

THE DIFFERENT FACES OF AN ISLAND IN THE NORTHERN ATLANTIC

An expedition right into the heart of Iceland - the highlands. And in summer.
This journey will not just inspire you. It will touch your soul - this trip is epic.

We'll provide you with the best equipment and the best guides. You won't believe what's possible.
We'll be seeking mountains, rivers, volcanos, all types of different landscapes.

Join us in this spontaneously versatile adventure through daily changeable weather situations.

VERSATILE LANDSCAPES.

MOUNTAINS HIGH - RIVERS DEEP

FLEXIBLE & SPONTANEOUS.

NOONE CAN PREDICT THE CONDITIONS AHEAD.

We are on an isolated island in the North Atlantic. Nobody can predict the local weather: the trip can change spontaneously at any time due to volcanic activity or extreme weather conditions: flooding turns rivers into dangerous traps, gases in the air force you to turn back or an earthquake spontaneously throws your plans for tomorrow out the window - it's an adventure!

We promise it will be the biggest adventure possible with the best guides for exactly this experience.

THE ADVENTURE BEGINS.

MEETING AND PREPARATIONS

We'll meet in Reykjavík on Saturday afternoon.

We will shuttle you from Iceland's capital city to the south of the island, where our base camp is.

Our team and your expedition vehicles will be waiting for you.

We'll start this experience with a comprehensive briefing and the inspection of the vehicles.

Afterwards, we'll have our first dinner together.

And then, our adventure begins...

TRAINING & FUN.

GET A FEEL FOR DRIVING AND MOVING IN EXTREME CONDITIONS!

We start our first training sessions the next day. Driving on the extremely versatile grounds of Iceland is really special and should be practised first. We will all get a feel for special driving techniques and the exciting vehicle technology. Some of us sooner, others perhaps a little later, but we'll take all the time in the world until we've all got a good feel for driving on ice, snow, mud, lakes and river beds.

And then we're off. We promise to make everything possible that the spontaneous weather and natural conditions allow.

COME WHAT MAY.

EXAMPLES OF PLANNED AND SPONTANEOUS ACTIVITIES

With a view of the Golden Circle, we discover together the most beautiful spots that the Atlantic island has to offer. Spots that Instagram doesn't yet know the planet has. All this is made possible by our technically well-equipped vehicles (including a dynamic tyre inflation system) and probably the best guides for the job.

Depending on the possibilities, the unpredictable weather and your spontaneous wishes, we will try to take in as many attractions as possible.

ADVENTURES AHEAD.

WE WANT TO MAX OUT ALL POSSIBILITIES

In Iceland, everything depends on natural conditions: Volcanic eruptions, geothermal activity, gas in the air and much more can change a day's plans within seconds.

We are prepared for this and promise the best possible experience.

You can look forward to one of the most exciting and extraordinary adventures on the planet.

ALL GOOD THINGS...

.. COME TO AN END

We'll be reaching Selfoss, a town in the south of Iceland, on Thursday afternoon. There, with a heavy heart, we gonna part ways with our loyal and reliable 4xe Rubicons.

From there we will shuttle you back to Reykjavík, where the adventure finally comes to an end.

For this time.

YES. THIS IS AURORA BOREALIS

A full-page background image featuring a brilliant aurora borealis in shades of green and yellow, dancing across a dark sky. Below the sky, a range of rugged, snow-covered mountains stretches across the horizon. The foreground is a calm body of water, which perfectly reflects the colors of the aurora and the dark silhouettes of the mountains.

Note: There is a possibility that we may see auroras on the trip. However, as this is a natural, spontaneous phenomenon, it cannot be guaranteed as part of this experience.

ALIS.

THE ICE IS GETTING THIN.

TAKE THIS UNIQUE OPPORTUNITY - A ONCE IN A LIFETIME ADVENTURE
